VYSAKH C

Full Stack Developer | React.js · Next.js · TypeScript · Python Django

Ph/Wh: +60174589901 | work.vysakh@gmail.com
Linkedin: https://www.linkedin.com/in/vysakhc
Portfolio: https://vysakhio.vercel.app/

PROFESSIONAL SUMMARY:

Full Stack Developer with around 5 years of experience building responsive, high-performance web applications using React.js, Next.js, TypeScript, and JavaScript, with backend experience in Python Django REST Framework and Node.js/Express. Proven track record integrating REST APIs, payment gateways (RazorPay, PhonePe), and headless CMS (Strapi) into production platforms. Experienced working in Agile/Scrum teams across banking, e-commerce, and edutainment domains, with hands-on exposure to CI/CD workflows, microservices architecture, and cross-functional collaboration with UI/UX, backend, and product teams. Comfortable leveraging AI-assisted development tools (GitHub Copilot, ChatGPT, Claude) to accelerate delivery.

CORE TECHNICAL SKILLS:

- Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Native, Zustand
- Styling: Tailwind CSS, React Bootstrap, SASS, Material UI
- Backend: Python, Django REST Framework, Node.js, Express.js, NestJS, Strapi (Headless CMS)
- Database & ORM: MongoDB, PostgreSQL, Prisma
- API & Real-Time: RESTful APIs, WebSocket (Socket.io), Axios, RazorPay, PhonePe
- Cloud & DevOps: AWS (S3), Git, GitHub, GitLab, CI/CD
- Tools & Practices: JWT Auth, JIRA, Confluence, Agile/Scrum, Microservices Architecture, Shopify

PROFESSIONAL EXPERIENCE:

Accord Innovations | Frontend Developer — Client: Al Rajhi Bank Feb, 2025 - Present

- Develop and maintain the corporate website (alrajhibank.com.my) using React.js and JavaScript, collaborating with UI/UX designers through the full feature lifecycle.
- Integrated Strapi headless CMS to replace static hardcoded content, enabling the Branding & Communications team to independently manage and update content across the platform without developer involvement.
- Designed custom Strapi content models and integrated third-party plugins to extend CMS functionality per evolving business requirements.
- Migrated static image assets to AWS S3 for optimized link-based delivery, improving page load performance across the site.
- Own end-to-end delivery in a Scrum workflow — sprint planning, daily stand-ups, and sprint reviews — using JIRA for tracking and Confluence for implementation/rollback documentation.
- Stabilized an internal loan application platform (React.js) by resolving bugs and inconsistencies inherited from a prior deployment phase.

Steyp Private Limited | Full Stack Developer

Aug 2021 – Oct 2024

- Built Stikart (stikart.in), a construction-focused e-commerce platform, using Next.js and TypeScript; implemented Tailwind CSS to cut responsive UI development time by 40%.
- Developed Wisetalkies (wisetalkies.com), an edutainment platform, from early-stage using React.js and React Bootstrap, integrating REST APIs via Axios and payment processing through RazorPay and PhonePe.
- Built an admin dashboard in Next.js with full CRUD API integration, streamlining internal content and operations workflows.
- Developed backend REST APIs for the Stikcon CRM platform using Python Django REST Framework, structuring the system into 4 independent microservices.
- Delivered both frontend (admin + user dashboards) and backend for Stikcon CRM, collaborating with the team via GitLab and resolving bugs identified in QA testing.
- Mentored junior developers and worked directly with the design team in an Agile environment to ship features on schedule.

Freelance Full Stack Developer

2023 – 2024

- Built an admin dashboard and companion mobile app in React/React Native for a dairy logistics client (Jeeva Milk), enabling regional milk collection tracking for admins and giving customers visibility into their livestock records, milk sales, and payments. (2023–2024)
- Developed Oxicart, a React Native e-commerce mobile application, as part of a 4-person freelance team. (2024)

PERSONAL PROJECTS:

Ember — Real-Time Restaurant Table Ordering Platform 2026

Next.js, TypeScript, NestJS, PostgreSQL, Prisma, Redis, WebSocket (Socket.io), Zustand, JWT,

Live Demo: ember-web-eight.vercel.app

- Built a full-stack platform enabling customers to order food by table number, with orders routed to a live kitchen dashboard and order status (Received → Preparing → Ready → Completed) reflected to customers in real time via WebSocket rooms — no polling.
- Implemented Redis-backed cart persistence (24-hour TTL) that survives page refresh, and JWT-authenticated admin/kitchen login.
- Built a live kanban-style kitchen dashboard in Next.js with Zustand for state management across cart, auth, and orders.
- Deployed the platform live using Vercel (frontend), Render (backend), Supabase (PostgreSQL), and Upstash (Redis).

EDUCATION:

- Bachelor of Technology, Mechanical Engineering
- Thejus Engineering College, University of Calicut | 2014 – 2018

CERTIFICATIONS & LANGUAGES:

- Certifications: AI Tools Workshop — be10x
- Languages: English, Hindi, Tamil, Malayalam
